

Bird Walk in June went well, about 8 people showed up.

Flowerbeds:

- Katie needs to send drawing to town

Red Trail:

- We need to walk the red trail
- Make sure Jim Davis has the red trail map that Vince sent
- Contact Story's and make sure they are still on board with trail plans

Maintenance:

- Was the stump from the tree that fell in front of the pavilion last summer removed?
- Was the battery for the solar panels at the pavilion reinstalled?

Programs:

- Maybe a late summer or early fall night hike? Contact Linda Gibbs about possibly leading it
- Maybe "Handling Back Country Emergencies"? Contact Mike Quinn

Next Meeting: 9/11/2014?

---

Attendance: Katie, Madeline, Steve, Vince, Bob

We will walk red trail as a group with a GPS.

Flowerbed plan is attached to meeting minutes. When a crew is sent over to do the work, Madeline should be present to make sure that the correct beds are moved and that healthy plants are not damaged.

Maintenance :

- The stump from the tree that fell in front of the pavilion last summer was not removed.
- The battery for the solar panels at the pavilion was not reinstalled.
- The trail work that the boy scouts were volunteering to do in May of 2013 but were told that the work was set aside for town's summer employees to do has still not been done. Woodchips were supposed to be put down on the yellow trail. Is this still in the works?
- There is broken glass on the orange trail where it comes near Woods Rd, near the junction with the blue trail.
- The town did a good job filling in eroded areas and cleaning up after the storms on July 8<sup>th</sup>.

Steve will work on potentially setting up a full moon night hike in the fall and/or a Backcountry Emergency course .
